Controller Box Power Consumption
 5V: Total 40W maximum 12V: Total 36W maximum

⚠ CAUTION

1. Please do not over power the controller box, it is dangerous and might cause damage!
Please check your PSU 5V & 12V power output specification, make
2. sure PSU single 4pin molex connector can support sufficient power output to avoid PSU cable over heat and meltdown.
3. Please use at least 450W PSU and 18AWG thickness 4Pin Molex cable if connect more than 6 fans.
4. It will NOT work with 4 pin RGB or 12V RGB fans or light stripes.
